**First International Conference on Data and Communication for Science, Technology and Society (ICDCST 2015)
Colombo, Sri Lanka
June 08-10, 2015**
(<http://socio.org.uk/icdcs/index.html>)

Data and communication are the two eyes for any research activity. They play significant role in promoting research in all the domains. In the last one decade the research community emphasizes basic principles and topics of fundamental importance concerning the technology and architecture of various domains and provides a detailed discussion of leading-edge topics.

Realizing its value the international conference on Data and Communication for Science, Technology and Society is planned and being organized. It lends a stimulating platform for interdisciplinary and multidisciplinary topics. The conference provides a review of the extensive research on the social structure and process of informal scholarly scientific communication and more recent research on the adoption and use of information and communication technologies by scientists for informal scholarly scientific communication.

The conference will have many tracks highlighting many major domains.

Track 1: Data Processing and its technical features
Track 2: E-communities, Digital Libraries, Social networks and Web
Track 3: Data and Society
Track 4: Data Management for Economics and Governance
Track 5: Electronic Communication and its processing
Track 6: Communication Networks
Track 7: Big Data
Track 8: Telecommunication
Track 9: Communication Technology
Track 10: Soft Computing
Track 11: Data Management for Science including Pure and Applied Sciences

Proceedings and Journal Publications

The conference will result in the publication of the proceedings and all the accepted papers will be published in large number of journals. The primary publication database is the DLINE (dline.info) and many other journals are in pipeline.
