The conference has-

Doctoral Consortium
DEMO Session
Journal Track
Mentorship Programme
Ph.D. Dissertation Competition
Proofreading translation program

Real-Time Computing covers a broad spectrum of the intensively developing area of low-latency priority-driven system responsiveness under certain time constrains to essential and decisive human-computer interactions with constantly incoming data stream. Research on real-time intelligent systems is of a multi-disciplinary nature, exploiting concepts from the areas as diverse as signal processing technologies, computational intelligence, location systems, data processing, digital document processing and embedded system design. To accomplish its real-time performance, systematic analysis is carried out when the systems are working.

Therefore, over the last few years real-time intelligent computing has radically transformed human life style. In the today’s competitive and highly dynamic environment, analyzing data in real time is a must to understand in detail how the systems are processing the data and to reason the outputs and anticipate the trends in intelligent computing, has become critical. To leverage the full potential of the opportunity build complex real time systems, intense research is required and this conference will serve as one such platform to manifest the ongoing research in the real time intelligence system.

The conference welcomes theoretically grounded, methodologically sound research papers from academia and industry that address variety of aspects and innovations related to real-time computing systems.

The scope of the conference includes, but is not limited to the following areas:

• Streaming data, streaming engines
• Big Data systems and applications for high-velocity data
• Analysis in advanced domains such as energy, sensors, etc
• Artificial Intelligence
• Broadband Intelligence
• Cloud Computing and Intelligence
• Collaborative Intelligence
• Crowdsourcing and crowd intelligence
• Data capture in real-time
• Intelligent Database Systems
• Data mining
• Intelligent Data Analysis
• OLAP for real-time decision support
• Data quality and cleansing
• Intelligent Fuzzy Systems
• Event-driven analytics
• Visualizing real-time data and information
• Intelligent Soft Computing
• Privacy and security in Intelligence
• Architectures for Intelligence
• Internet of Things
• Intelligent Robotic Systems
• Smart Services and Platforms
• Intelligent Transportation Systems
• Mobile Smart Systems
• Trace-based intelligent real-time services (eye-tracking, image tracking)
• Real-time intelligent alert systems
• Machine translation in real time
• Multilingual information access
• Multiagent Intelligent Systems
• Intelligent Information Systems
• Adaptive vision algorithms
• Real-time Intelligent Network solutions
• Real-time distributed coding
• Real-time modelling user’s information needs
• Real-time noise removal systems
• Real-time intelligent communication
• Real-time remote access systems
• Decision support systems in real time
• Real-time multiprocessor systems

Honorary General Chair
Idriss Mansouri, President Hassan II University, Casablanca, Morocco

General Chair
Abderrahim Ssekaki, University Hassan II, Morocco
Jolanta Mizera-Pietraszko, Opole University, Poland

Program Chairs
Abderrahim Ssekaki, UH2C, Casablanca, Morocco
Mohamed Lahby UH2C, Casablanca, Morocco

Important Dates
Paper Submission: July 15, 2017
Paper Notification: August 15, 2017
Camera ready: September 15, 2017
Registration: September 25, 2017
Conference Dates: October 18-20, 2017

Submissions at http://www.socio.org.uk/rtis/paper-submission/
Contact: rtis at socio.org.uk
